

## Education

**Eötvös Loránd University***BSc Computer Science, GPA: 4.38***Budapest, Hungary***Sep 2022 | Expected 2025*

## Projects

**Web Development Project** HTML, CSS, JavaScript*<https://asilov-komron.github.io/alblak52.github.io/index.html>*

Created a static website as a coursework for "Web Development" subject using front-end web technologies.

**Book Cards Web Application** PHP, JSON, CSS, JavaScript*<https://github.com/asilov-komron/PHP-book-application>*

This web application allows users to store and manage book cards, providing additional information about each book. The application is built using PHP for backend logic and JSON files to serve as the database.

**Django Blog App** Python, Django, HTML, CSS*<https://github.com/asilov-komron/Pro100-blog-django>*

This is my pet project called "Pro100 Blog". It is a blog post app, that was created using python "Django" framework, that enables user, posts creation and management where the MTV architecture was implemented.

**JavaScript Board Game** JavaScript, HTML, CSS*<https://asilov-komron.github.io/JavaScript-Assignment-ELTE2024-semester3/index.html>*

Another project using JavaScript to create a board game. In this simple 2d game, the player needs to find a pair of objects in order to win, also there are hints showing the direction of tools to be find.
